

Kofax Import Connector™ extends the Kofax® platform to process documents from electronic sources such as email, fax, file shares or web services.

This powerful and intelligent add-on to Kofax Capture™ and Kofax Transformation Modules™ normalizes the inbound electronic content to specific process-ready formats further accelerating business transactions and providing a single solution for capturing inbound electronic documents in any format from virtually any source.

### It is ideal for organizations looking for a single vendor solution that

- Receive a lot of emails, faxes or a broad variety of documents coming in through files shares and web service interfaces
- Manually classify and route these business documents
- Manually open email attachments or receive documents
- Manually key information from emails, attachments and faxes into line of business applications
- Need to archive received electronic documents in a business process define format for regulatory compliance

### It enables Kofax Capture and Kofax Transformation Modules to

- Classify incoming emails, faxes or documents imported through files shares or web services
- Extract and validate relevant information from meta data such as header, body text and any attachments
- Deliver the information into an ECM, CRM, ERP or other business application for immediate, appropriate processing
- Deliver the images into an archive for corporate compliance purposes
- Monitor the complete inbound capture process from a single application and provide chain of custody independent of the source or location of the business documents

### It enables organizations to

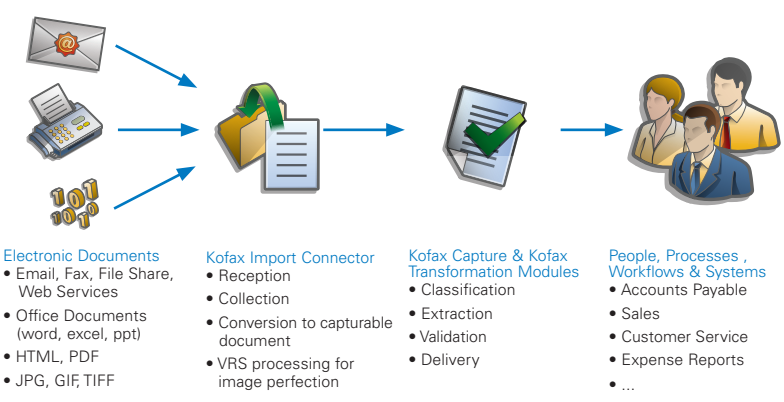

- Automate and streamline incoming electronic document routing and processing
- Reduce labor intensive manual input and associated data errors
- Reduce processing costs per customer contact
- Improve customer service with faster processing and shorter response times
- Increase visibility of business processes by providing chain of custody

### Specifications

- Receives and imports messages via email (SMTP, POP3, IMAP4,EWS) and fax (fax servers or FoIP)
- Automated import of electronic documents through file shares and web services

### About Kofax

Kofax® is a leading provider of smart process applications for the business critical First Mile™ of customer interactions. These begin with an organization's systems of engagement, which generate real time, information intensive communications from customers, and provide an essential connection to their systems of record, which are typically large scale, rigid enterprise applications and repositories not easily adapted to more contemporary technology. Success in the First Mile can dramatically improve an organization's customer experience and greatly reduce operating costs, thus driving increased competitiveness, growth and profitability. Kofax software and solutions provide a rapid return on investment to more than 20,000 customers in financial services, insurance, government, healthcare, business process outsourcing and other markets. Kofax delivers these through its own sales and service organization, and a global network of more than 800 authorized partners in more than 75 countries throughout the Americas, EMEA and Asia Pacific.
