

BCS Intelligent Forms Automation

Solution overview

Intelligent Forms Automation with BCS drive digital transformation

Automates information collection

Decreases processing times

Lowers costs, accelerates and improves customer experience

Establishes full **auditing** capability

Customer facing industries are experiencing a massive paradigm shift. Gone are the days for paper-based transactions and huge lineups at physical locations. Technological advancements, customer expectations and demographic shifts are major drivers propelling digital transformation. The super competitive landscape for customer wallet share is forcing traditional industries to rethink their digital strategy, adjust constantly and act judiciously but rapidly at the same time.

Traditional powerhouses are feeling the heat from disruptors changing the way customers engage with their industry and evaluate and obtain products and services. Technology has already begun to radically change how we interact with traditionally paper-based processes. Furthermore, organizations that want to retain customers and expand their customer base are recognizing it is not enough to provide online systems to perform tasks.

Digitally transform

BCS Intelligent Forms Automation offers organizations from across many industries with numerous ways of streamlining workflow processes, a better customer experience platform and the modernization of existing IT ecosystems that deliver products and services. With BCS Intelligent forms Automation, organizations can achieve a substantial ROI by executing and deploying solutions to their customers.

Increased revenue opportunities

The Intelligent Forms Automation Product Suite offers unique capabilities that layer high-value applications with an organization's existing back-office platforms. They facilitate accurate and complete data collection with intuitive and modern interfaces that enable analytic and artificial intelligence platforms to accurately capture data to analyze trends. Furthermore, with Intelligent Forms Automation, organizations are poised to extend the reach of their products and services in a ubiquitous mobile experience.

Innovative technology

BCS's discrete data collection, electronic forms, workflow, financial content aggregation and system integration solutions with Intelligent Forms Automation will accelerate the delivery of next generation applications. BCS's unsurpassed technology is a result of more than 30 years of experience across multiple verticals.

Question 3 - Tell Us About Yourself

Please select all of the following that apply to you and your household:

<input type="checkbox"/> I am single	<input type="checkbox"/> I have a child/children
<input type="checkbox"/> I am married/in a common law relationship	<input type="checkbox"/> I am the parent of a child/children with a disability
<input type="checkbox"/> I am separated/divorced	<input type="checkbox"/> I am taking care of my parents

Why is this important?

When deciding on coverage, it's important to consider your loved ones' financial needs. Keep in mind that as your life situation changes, so does their need for insurance.

Example:

Web-based form

Enhance customer experience

With Intelligent Forms Automation, organizations can differentiate from the competition by providing customers with a faster, easier, more modern experience. An intuitive engagement experience in the way a customer wants to be engaged will greatly increase satisfaction and the likelihood they will return.

This improved engagement provides the organization with more timely and accurate customer information. This information can be used to drive automation allowing the organization to quickly make better decisions and improve customer service resulting in increased revenue.

Leverage existing technology investments

BCS takes pride in the ability to seamlessly integrate with existing IT ecosystems, content management, Line of Business and other homegrown back-office systems.

Reduced development costs

BCS's products are designed for multiple industries and use cases, which makes it easy to build new applications or simply add new and advanced capabilities into existing applications without significant re-engineering or training. This reduces development time and cost and accelerates time to market for products and services.

Intelligent Forms Automation with BCS Advanced Capture

BCS enables end users to efficiently capture and archive paper and unify all paper-based processes throughout the enterprise. This unified approach ensures a consistent experience and full audit trail of information. BCS Advanced Capture intelligently identifies any structured form or document type and automatically processes and validates without manual intervention. The solution virtually eliminates all human intervention and errors.

BCS Intelligent Forms Automation

BCS Intelligent Forms Automation redefines workflows, by accelerating cycles, ensuring compliance and connecting customer and providers with information and processes, regardless of location. Plus, BCS enables real-time access to, and use of, mission-critical content throughout the enterprise.
